◀ Marquess, Decograin

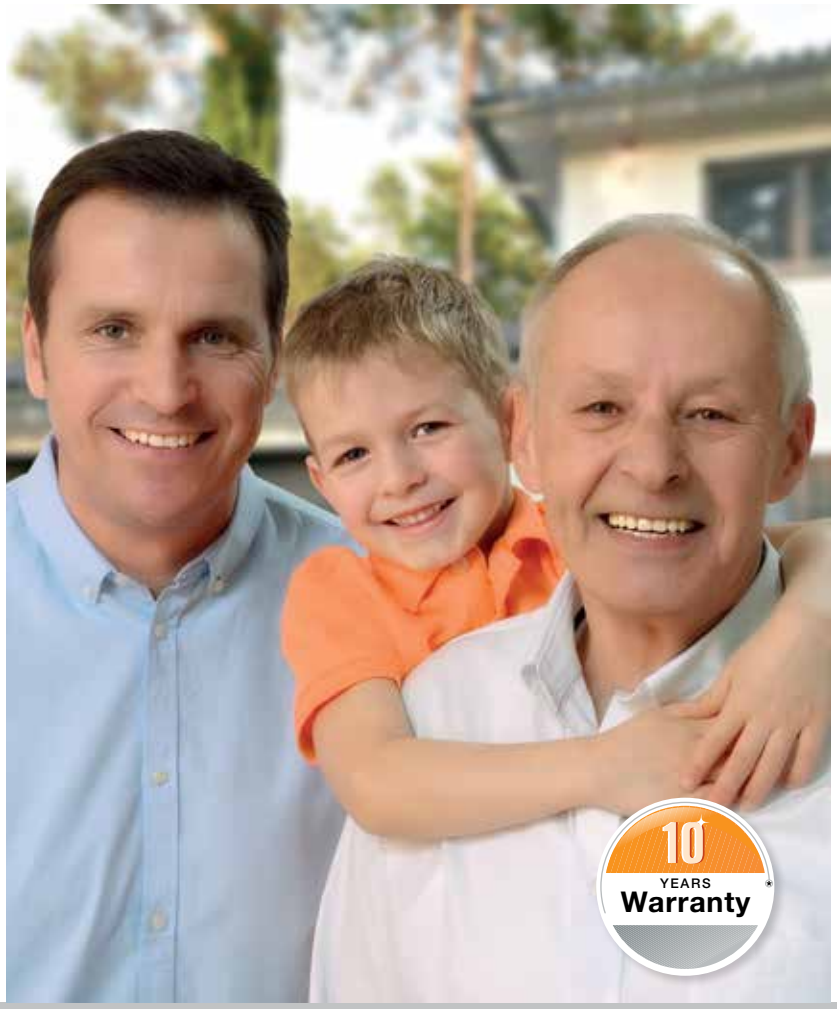

“A good name has to be earned.” August Hörmann

In line with the founder’s philosophy, the Hörmann brand today is a true promise of quality. The family-owned company has over 80 years of experience in door and operator construction and, with sales of over 20 million doors, is no. 1 in Europe. This is very reassuring when buying a Hörmann Series 2000 garage door.

1 Based on German engineering, assembled in the U.K.

All doors and operator components are developed and manufactured by Hörmann. Hörmann Series 2000 garage doors are assembled at the Hörmann factory in Leicestershire from components sourced from both the continent and the UK.

2 Garage doors for generations

Thanks to excellent technical solutions and uncompromising quality assurance, you receive a 10-year warranty on all Series 2000 garage doors and 5 years on all Hörmann operators.*

* The complete warranty conditions can be found at: www.hormann.co.uk

3 An eye on the future

Hörmann is setting a good example. This is why the company has obtained over 70 % of its required energy from green sources and will continue to increase this percentage. At the same time, many tonnes of CO_2 are saved each year thanks to the introduction of an intelligent and certified energy management system. And last but not least, Hörmann also offers products for sustainable construction. Find out more about Hörmann's environmental activities in the "We think green" brochure.

Hörmann Series 2000 steel up-and-over doors

Series 2000 steel doors are timeless in appearance, never ageing your property. Whether choosing one of the ribbed or panelled designs, they offer a quiet elegance blending in with any environment whilst giving a lasting prestige.

The doors are galvanised with a high-quality polyester powder-coating and come protected against adverse weather conditions and corrosion, maintaining the long term beauty of the door.

Side door styles

Side doors come with a profile cylinder lock and a black, synthetic lever/lever handle set as standard. They are optionally available in the same material choices as the garage door handles, please see page 19.

Matching side doors are available for all steel designs except 2101, 2103, 2504.

Hörmann Series 2000 timber up-and-over doors

Whatever the style of your property, traditional or modern architecture, our styles of timber doors in either panelled or tongued and grooved design, offer you the choice to find a style that will add warmth and character to your home.

The carefully selected cedar wood is not only chosen for its aesthetic beauty but also for its natural durability.

▲ Style 2009 Vertical, Light Oak

▲ Style 2010 Chevron, Light Oak

◀ Style 2009 Vertical, Golden Oak

Please note:

All our timber doors are carefully manufactured and supplied with a factory-finish dip immersion coat, for temporary protection. We use Remmers Induline GW306 base stain primer 006 Light Oak. Additional on-site finishing is required. Fully finished wood stain and colour options are also available. With wood being a natural product, any finish may vary and movement of components and joints may occur, particularly in changes of weather from very wet to hot sunshine. This is what gives your door its individual character.

Wood needs protecting. That's why, in addition to the factory impregnation, it is important to apply a pigmented wood preservative to a timber garage door, in order to protect it against atmospheric influences and the effects of UV rays.

Matching side doors are available for all timber designs.

Hörmann Series 2000 GRP up-and-over doors

If low maintenance is an important factor to you, a Glass Reinforced Polyester door is just what you're looking for. While requiring minimum maintenance it will give you the long-lasting elegant look and character of genuine timber.

Our GRP doors are available in a supersmooth, high gloss white finish and a variety of timber looks.
You will surely find the right finish to complement all your architectural requirements.

The timber character surface finish of GRP doors is not only different by colour but also by its underlying appearance.

Clear views with glazing

An additional glazing is not just a design element. Daylight ensures a bright, friendly atmosphere. Ideal, if the garage is also used as a workshop.

Select depending on the door style different types of glazing.

Safety features to the latest European Standard 13241-1

1 Finger-trap protection

2 Track roller well

3 Spring system

Safety checklist
for your old retractable up-and-over door

- ☐ Do flexible plastic strips on the frame and door leaf prevent trapped fingers? 1
- ☐ Is there a safety distance of 25 mm between the lifting arm and the frame? 1
- ☐ Does the bearing bracket have protective caps to prevent injury if inadvertently reached into? 1
- ☐ Is the door safely and securely guided as well as protected against uncontrolled movements? 2
- ☐ Are the tracks designed in such a way that it is impossible for the rollers to derail? 2
- ☐ After opening, does the door come to a safe stop? 2
- ☐ Is the door leaf safeguarded against crashing to the floor? 3
- ☐ Is it guaranteed that even if a spring should break, an imbalance no greater than 200 N is produced? 3
- ☐ Are the springs safeguarded to prevent them from being catapulted into the air? 3
- ☐ Is the spring system designed in such a way that there is no risk of trapped fingers? 3
- ☐ On power-operated up-and-over doors: are the maximum closing forces to EN 13241-1 complied with?

Even if you have answered only one of the above with “no”, your door is no longer safe.

Retractable door

- Retractable mechanisms are ideally suited to automatic operation.
- Single or double door version available.
- An optional 4 point locking kit is available. It comprising steel locking bar rods and slam-shut latches to increase the number of locking points.
- Hörmann offers a steel fixing frame for all single and double retractable doors. This frame makes an on-site timber frame redundant and saves valuable installation time as it is quick and easy to fit.

Safety features to the latest European Standard 13241-1

1 Cable drum

2 Internally guided cables

3 Anti-fall safeguard
4 Protective cover profiles

Safety checklist
for your old canopy up-and-over door

- [ ] Is the door safely and securely guided as well as protected against uncontrolled movements? 1
- [ ] Does your door have a cable drum with deep grooves to ensure the cable fits securely and prevents cables jumping? 1
- [ ] Are the door's cables internally guided? 2
- [ ] Is there an anti-fall safeguard fitted to your present door to prevent injury if a cable breaks? 3
- [ ] Are the tracks designed in such a way that it is impossible for the rollers to derail? 3
- [ ] After opening, does the door come to a safe stop? 3
- [ ] Do protective cover strips on the frame and the door leaf prevent trapped fingers? 4

Even if you have answered only one of the above with "no", your door is no longer safe.

Canopy door

- Only Single door version available.
- An optional 4 point locking kit is available. It comprising steel locking bar rods and slam-shut latches to increase the number of locking points.
- Hörmann offers a steel fixing frame for all single and double retractable doors. This frame makes an on-site timber frame redundant and saves valuable installation time as it is quick and easy to fit.

Design your own door with the open-for-infill frame

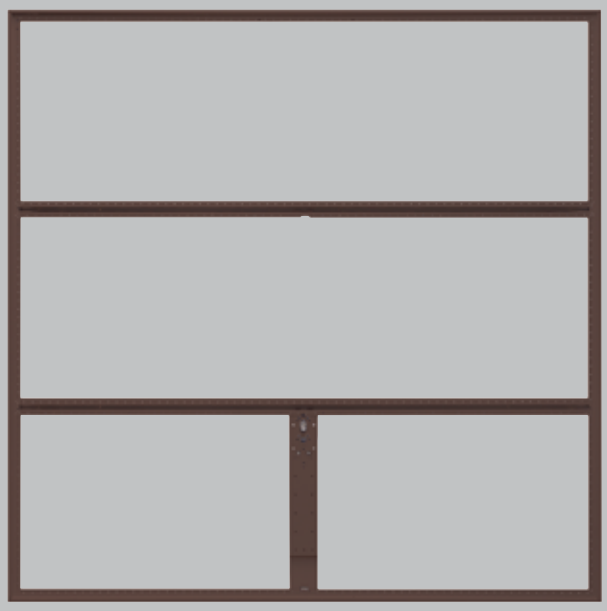

- Extremely sturdy frame construction with reinforced struts. Fully welded!
- Min. infill weight: 6 kg per m^2, max. infill weight 10 kg per m^2.
- Fully galvanised, door leaf frame additionally with high-grade polyester primer coating Terra brown (RAL 8028) or Traffic white (RAL 9016).
- Frame and struts pre-drilled at 30 mm spacings.
- Illustrated fitting instructions with suggested designs.

With design 2011 open-for-infill, door widths of up to 5 m are possible (for any width over 4267 mm, please refer to the N500 range) if the permissible infill weight is complied with.

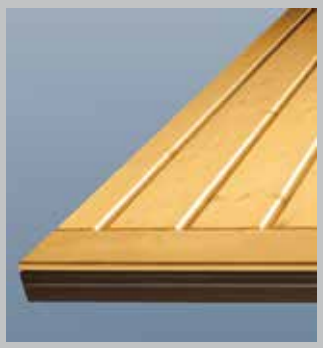

The Hörmann open-for-infill leaf frame is perfectly prepared to accept a timber infill of your own design.

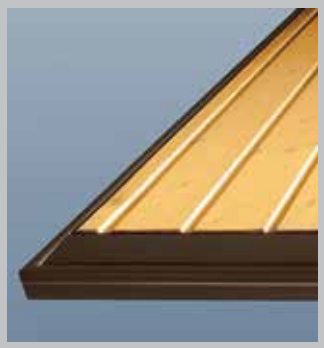

2011 open-for-infill frame
Door width up to 4267 mm

This door construction offers you two design options:

Infill overlapping the frame, whereby the frame and bottom section are entirely concealed.

Timber infill within the frame with visible bottom section to protect against spray water.

Hörmann offers optimal solutions for every fitting and renovation situation

Benefit from the inexpensive standard sizes. Of course, we can also easily provide you with any required special solutions.

In addition, your Hörmann partner's all-inclusive package:

- Expert advice
- Measurements on site
- Professional installation
- Construction and environmentally sound disposal

Compensation panels and modernisation panels

Should your garage opening be higher and wider than the inexpensive standard sized garage door, simply adjust the sides and the lintel with panels that match the door.
If the brickwork is damaged while removing the old door, modernisation panels 1 ensure a clean result without the need for further plastering.

Rubber bottom profiles (optional)

In garages without a threshold, a flexible, weather-resistant rubber bottom profile helps keep out passing debris.

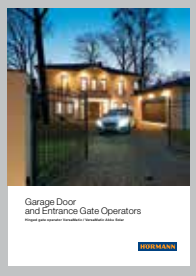

Optional retractable plus

Still conforming to the EN 13241-1 this gear allows for a clear drive through passage wider than the standard retractable gear.
This makes parking the car in the garage a lot more convenient.

The innovative Hörmann operators for automatic sectional and up-and-over garage doors

Hörmann garage door operators are perfectly matched to your Hörmann garage door. The result: simple operation, maximum convenience and the greatest operational safety. Our elegant hand transmitters allow you to open your gate from your car as easily as you would operate a TV. You can also operate your door using stationary control elements, such as a radio code switch or radio finger-scan.

Position of anchors

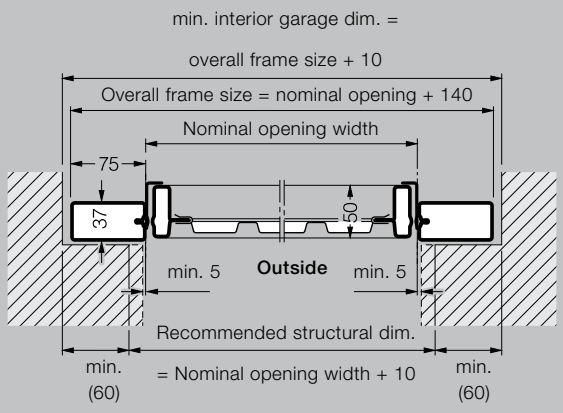

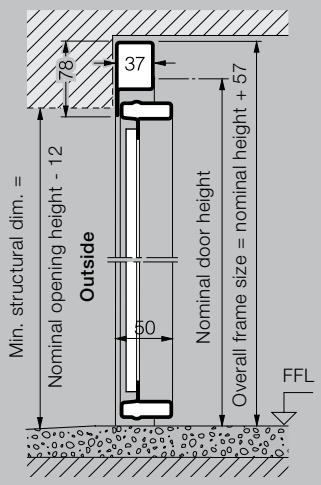

* Distance back for ProMatic / SupraMatic electric operator:
3200 mm up to door height 2500 mm
3450 mm up to door height 2750 mm

Fitting behind the opening

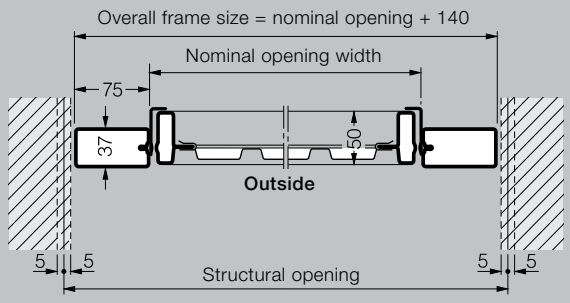

Door with flat floor

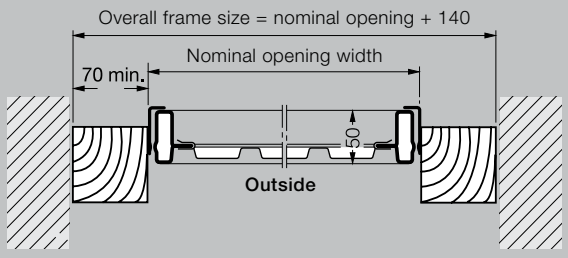

The recommended structural dimensions are recommended planning dimensions. Minimum sideroom, headroom and opening sizes are all based on these dimensions.

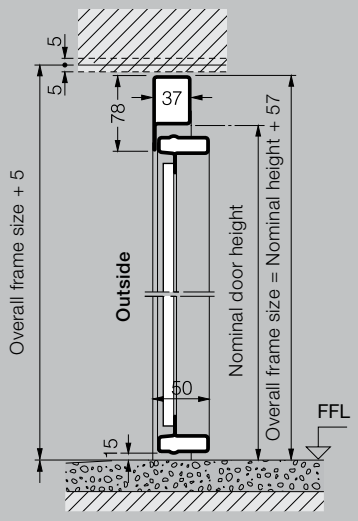

With ProMatic / SupraMatic operator
No additional headroom required.
Exception: some timber designs allow 15 mm clearance.

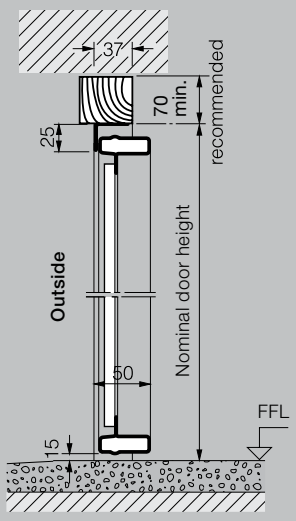

Fitting in the opening

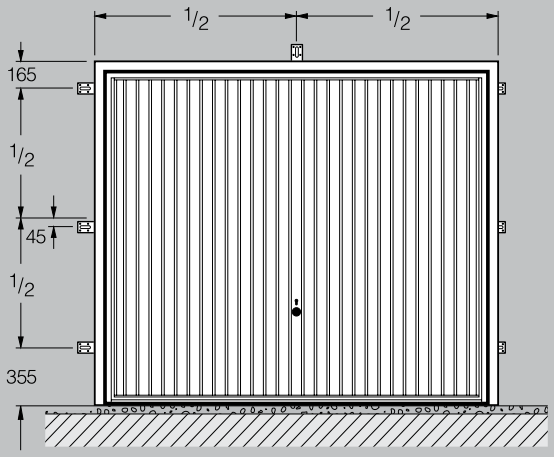

Fitting in the opening requires that the given dimensions be adhered to with greater accuracy.

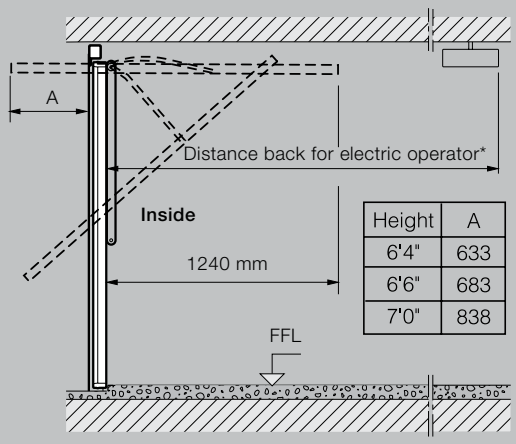

With ProMatic / SupraMatic operator
No additional headroom required.
Exception: some timber designs allow 15 mm clearance.

Position of anchors

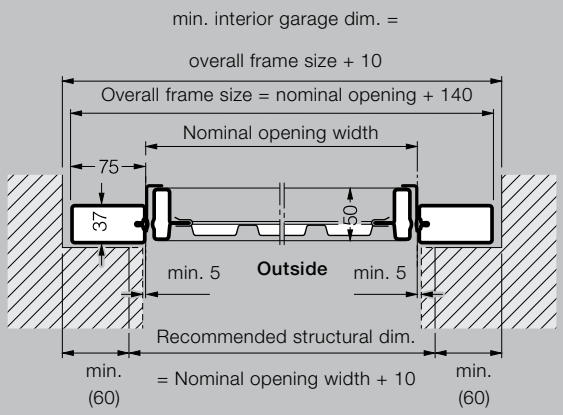

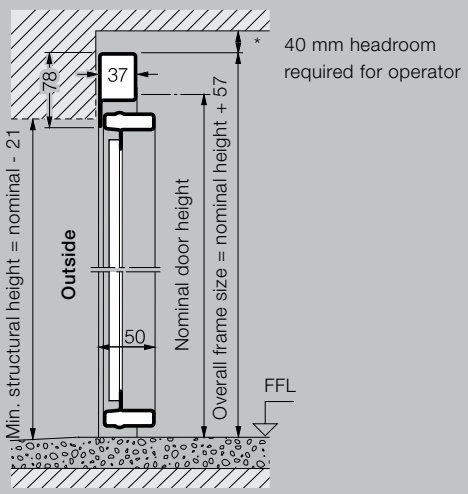

Height	A
6'4"	633
6'6"	683
7'0"	838

Clear passage
Width: nominal opening less 40 mm (1½")
only within bottom 1/3 due to flexible seals.
Height: nominal door height - 140.

For doors with operator 40 mm headroom above top crossframe required.
(Overall frame size + 40 mm)

Fitting behind the opening

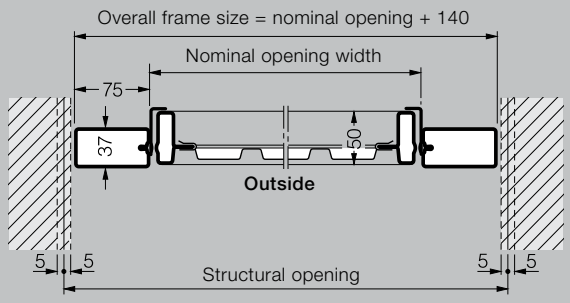

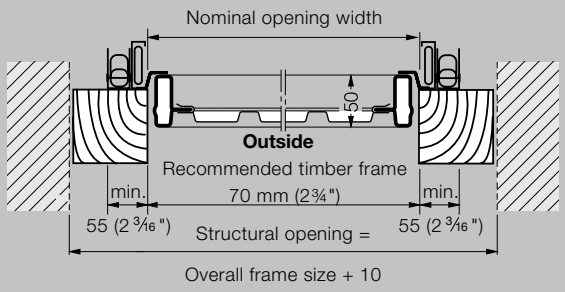

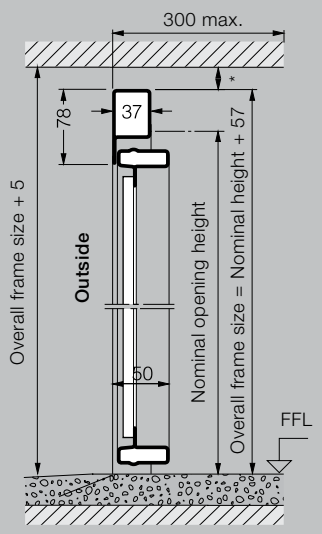

Behind opening installation with the Hörmann steel frame allows for a wider range of structural openings to be spanned, this can be particularly helpful with non-standard openings which would normally require special sized doors. The diagrams show the minimum tolerances that should be adhered to.

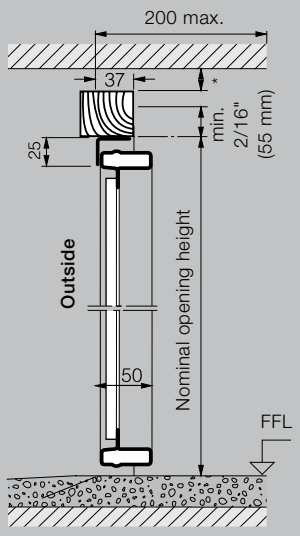

The overall frame sizes are shown as additions to the nominal opening sizes.

Fitting in the opening

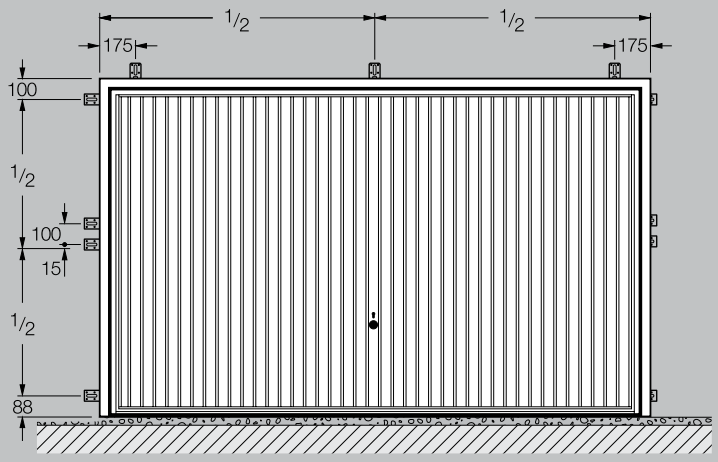

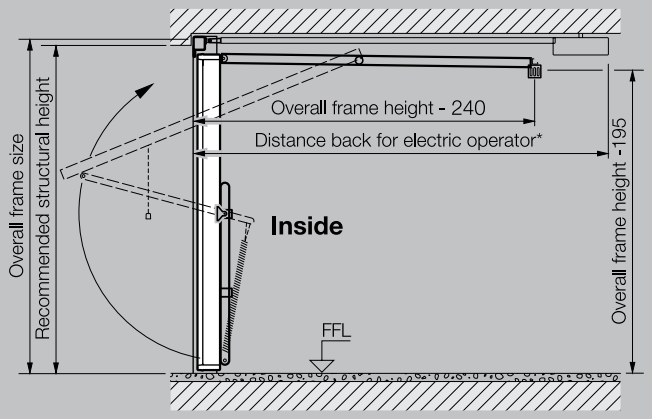

* 40 mm headroom required for operator

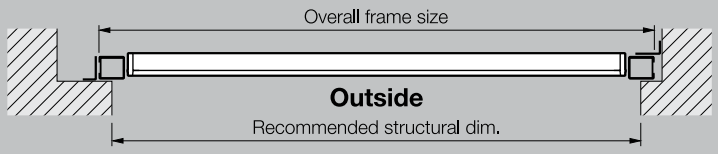

The size chart gives the structural opening sizes for each door size, this frame is the standard 2¾"(70 mm) square. A narrow application gear is provided for doors to be fixed to timber frames allowing the frame to be a minimum of 2²⁄₁₆"(55 mm) square if required, allowing the door to be fitted to smaller structural opening. For electric operation with canopy door a bow arm must be purchased separately.

For overall dimensions of Hörmann steel frame, add 5½ (140 mm) to nominal opening width and 2¼ (57 mm) to nominal opening height.

Position of anchors

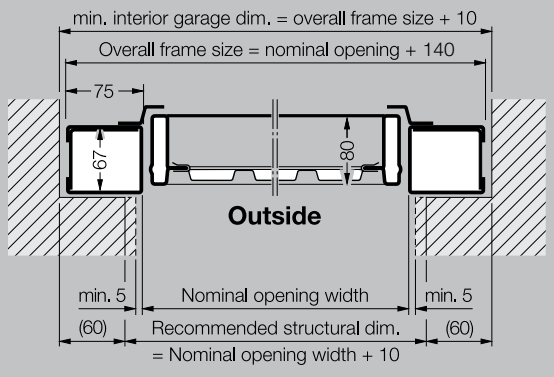

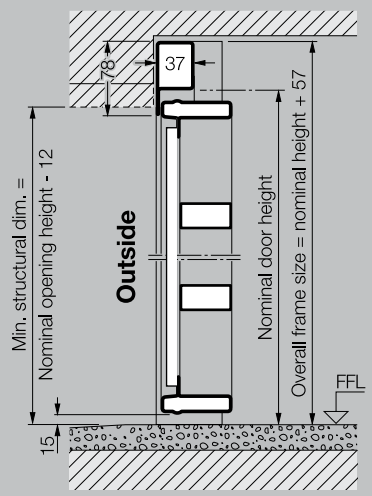

* Distance back for ProMatic / SupraMatic electric operator:
3200 mm up to door height 2500 mm
3450 mm up to door height 2750 mm

Fitting behind the opening

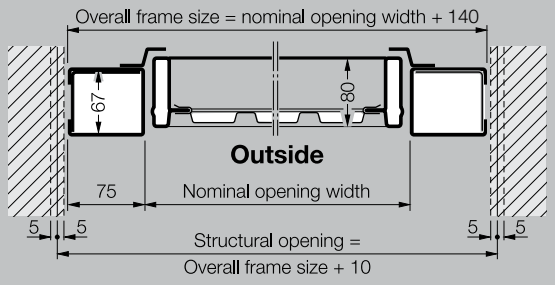

Door with flat floor

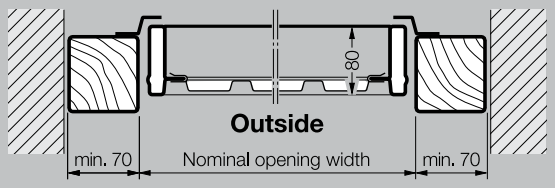

The recommended structural dimensions are recommended planning dimensions. Minimum sideroom, headroom and opening sizes are all based on these dimensions.

1000	2000	1010	2005	955	1962	1977	1050
1000	2125	1010	2130	955	2087	2102	1110

Standard sizes with steel infill and open-for-infill frames are supplied for external fitting as standard. For internal fitting, fittings can be reversed. Designs with timber infill for external fitting only.

Block frame for fitting into the opening: dimensions and versions on request.

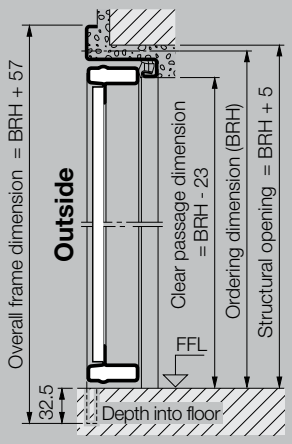

Maximum size range (BR): 1250 x 2375 mm.

Single leaf door with stepped floor

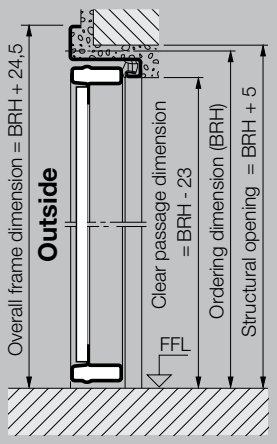

Single leaf door

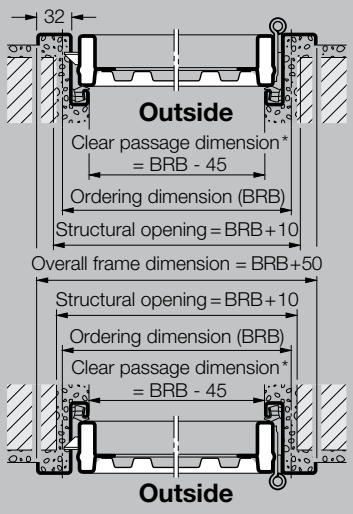

Supplied with bottom threshold as standard, will be removed on site

Single leaf door

Supplied without bottom threshold

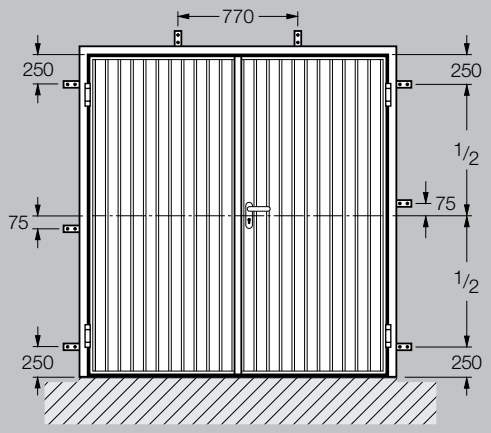

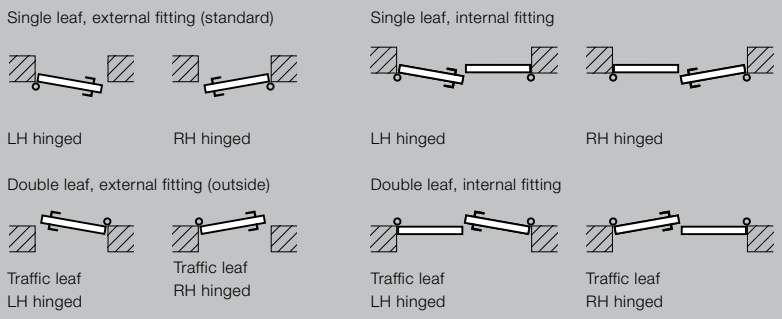

* With an opening angle of less than 180°, the clear passage width is reduced.

Double leaf

Position of anchors

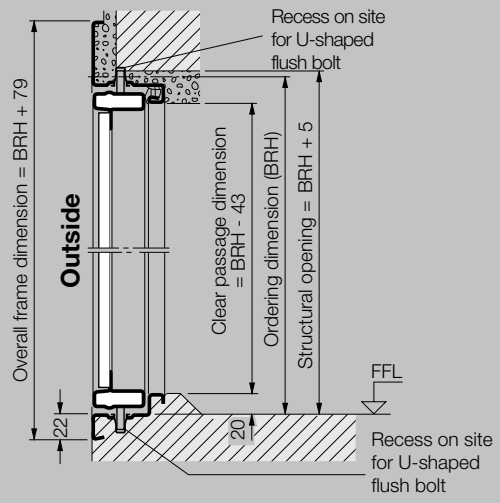

External fitting with threshold profile.
For internally fitted doors, the threshold angle/ transport angle should always be removed. Adequate water drainage to the outside must then be ensured. For doors on the weather side external fitting is preferable.

Supplied as standard for external fitting, traffic leaf on the right.
State on order if internal fitting or left hand traffic leaf is required.
Equal division of leaves only.

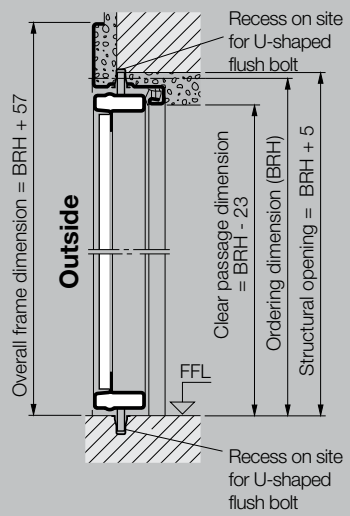

Block frame for fitting into the opening: dimensions and versions on request.

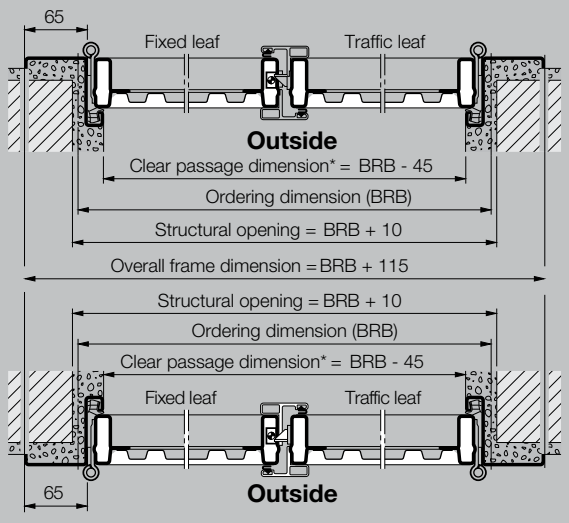

Size range: Width (ordering size) from 1300 to 2500 mm,
Height (ordering size) Panelled designs only up to BRB = 2000 mm.

Door with flat floor

Door with stepped floor

* With an opening angle of less than 180°, the clear passage width is reduced.
